## Contenido

## Robótica paralela

- Definición de un robot paralelo
- Modelo postura de un robot paralelo
- Modelo cinemático de un robot paralelo
  - Modelo cinemático directo de las velocidades
  - Modelo cinemático inverso de las velocidades
- Modelo dinámico de un robot paralelo

#### **Robot serial**

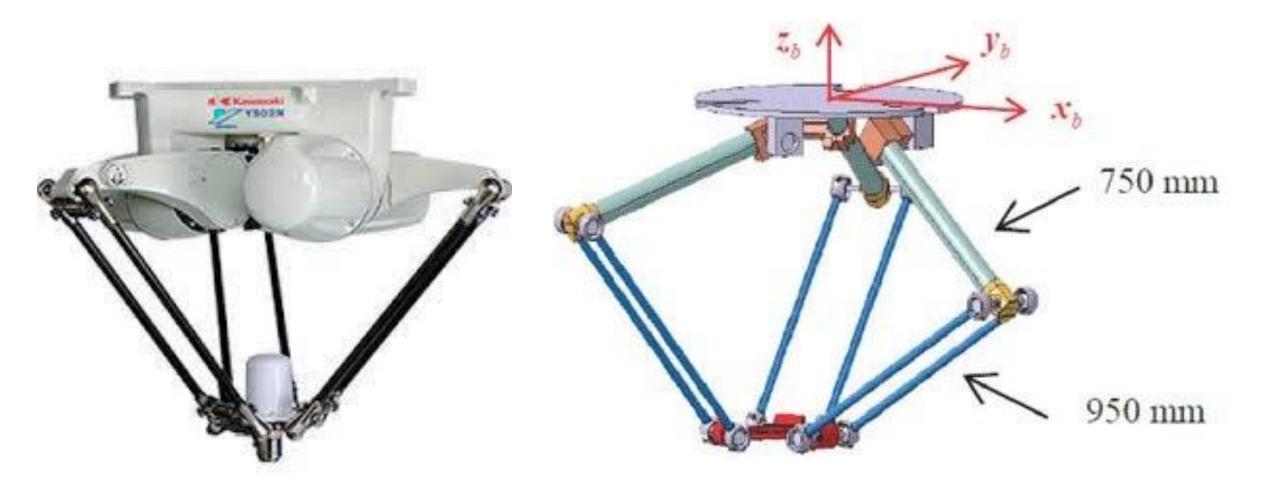

Un robot serial esta compuesto por una cadena cinemática "abierta", donde cada una de sus juntas es actuada con el fin de mover un efector final con el fin de realizar una tarea.

#### **Robot paralelo**

Un robot paralelo es un robot serial compuesto por un arreglo de cadenas cinemáticas las cuales comparten una referencia inercial (base fija) en común y una referencia en común relacionada con su efector final (base móvil), para este tipo de configuraciones no todas sus juntas son actuadas.

## Sistemas MIMO

# 3 entradas 3 salidas Robot

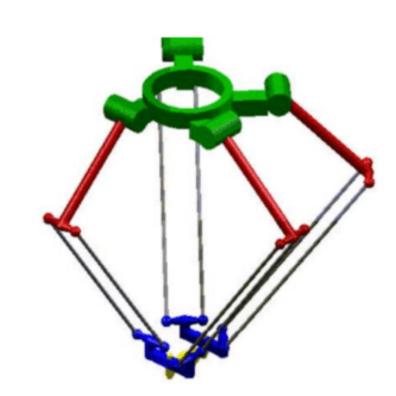

F(x)

#### **Robot paralelo**
